

# Carelyt

**ELECTROLYT+GLUCOSE**

## Indication:

Flying Salt for Racing Pigeons

CARELYT monitors the acid and water balance of your birds.

It accelerates the recovery of your pigeons after long flights.

It brings them back in top condition in short term.

## Feeding instructions

When the pigeons return home from their flights they are very thirsty.

Give them fresh clean water as a start. After 2 hours give them fresh

water again but mixed with CARELYT. Dissolve 25 g of CARELYT

(1 tablespoonful) in 2 litres of drinking-water and have it at their

disposal for 24 hours. Thereafter, remove it and continue with

normal fresh drinkingwater. CARELYT can be used in combination

with most medicines for racing pigeons.

## Packaging

600 g product for sports birds.

## Contains per 1000 g

100 g. natriumbicarbonaat

100 g. natriumchloride

60 g. kaliumchloride
