

Combi Mix 4 in 1

.....

Indication:

Combi mix 4 in 1 is very suitable for the treatment of **trichomonades, hexamites, coccidiosis, and mucus in the throat**. During the racing season it is important for the birds to be in optimal condition so that nothing stands in their way to perform well. Combi mix 4 in 1 helps to achieve this and can be administered both preventively and curatively.

Symptoms:

Lack of condition, disturbed digestion, flat and watery droppings. the pigeons throat will contain more mucus than normal and will have a reddish colour, small white to yellowish areas in the mouth cavity, respiratory problems.

Dosage

Prevention: 1 measuring spoon (=5g) for 2 litres drinking water during 1 or 2 days every 2 weeks, preferably starting the day after the race. Stir well before use!

As a treatment: 1 measuring spoon (=5g) for 2 litres drinking water during 5-7 successive days.

This cure may be repeated if necessary after a few days.

Combi mix 4 in 1 is a water-soluble powder which can also be given under the feed.

Measuring spoon 1+5 g included.

Advice for use:

- Put the sick animals in quarantine.
- Treat all of your birds, not only the sick ones.
- Mix the needed dose in an amount of drinking water or feed the animals consume within one day.
- Be sure no other water is available during the treatment.
- After medication give your animals MULTIVITAMIN (the day after last day of treatment).
- Give a maintenance dose of MULTIVITAMIN every week.
- Disinfect lofts/houses.
- Do not give the day of shipping.
- In case of doubt or persistent problems, consult a vet. surgeon.
