

Multivit-mix

Multivit-mix is a special mixture of hydrosoluble vitamins and glucose. These vitamins are of great importance for the metabolism of the bird. Glucose is added to this mixture in order to provide direct energy to the birds.

Multivit-mix contributes to:

- enhanced resistance • good breeding • optimum recovery

The daily vitamin requirements of a bird are very important, deficiency of vitamins can cause several problems, for example:

- Deficiency of vitamin A can cause low fertility in the male and female, produce changes in the lining of the respiratory and alimentary tract which make invasion by infection easier, affect eyesight and cause death of the embryo.
- Deficiency in the Vitamin B group can cause nervous disorders, retardation in growth and development of feathers, upset in fat metabolism, poor egg hatchability and poor chick development.
- Deficiency of vitamin D will cause such conditions as Rickets and soft-shelled eggs

Multivitamins are given at least once a week:

- During growing, moulting and breeding
- During heavy strain and stress
- After treatment for illness, worming and inoculations.

Dosage

Dosage: Ornamental birds:

- As a one-off dose after medication: 2 g/0.5 l drinking water or 2 g/250 g food.
- As a maintenance dose: twice a week 1 g/0.5 l drinking water or 1 g/250 g food.

Multivit-mix can be added to drinking water or administered with the feed.

Measuring spoon 1+5 g. included.

Interaction(s): not known. Contra-indication(s): over dosage.

NOTES: READ INSTRUCTIONS BEFORE USE.

Store dry, out of reach of direct sunlight, between 0-30 °C

Shelf life after first opening; One (1) year.

Batch number and expiry date: see package.

Avoid contact of the medicine with your hands.

Keep out of reach of children.

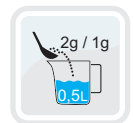

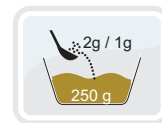

For animal treatment only. Not for animals intended to produce food for human consumption

Dispose of empty packaging and remaining product in the household refuse.

This veterinary medicine is marketed in accordance with the small animal exemption scheme

Contains:

200 g Multivitamins

COMPOSITION

contains/	gehalten per kg
