

Carelyt

Electrolyte + Glucose for optimal recovery

Flying Salt for Racing Pigeons Carelyt monitors the acid and water balance of your birds. It accelerates the recovery of your pigeons after long flights. It brings them back in top condition in short term.

Dosage

Mix 12.5 g Carelyt (1 measuring spoon) in 1 litre of water and put the mixture by the birds.. For the more exhausted pigeons, combine Carelyt with Glucovit or Herbal Care. Carelyt can be satisfied at combination of safe medicines for racing pigeons.

Composition (per 1000 g)

100 g. natriumbicarbonaat
100 g. natriumchloride
60 g. kaliumchloride

600 g
PVC jar
