

# Fast Form

*Improve the performance and disinfect the drinking water*

## Indication:

To improve performance and disinfect the drinking water.

High performance pigeons can not just be given grain and water, the birds will be in top form with FASTFORM!

FASTFORM contains an essential amount of minerals (Co, Cu, I, Fe, K, Mo, Na) which:

- are needed for a good condition and a faster recovery
- contribute to the proper transport of oxygen and the formation of blood
- ensure proper acid-base balance in the body

## FORMULA:

**Composition** (per 1000ml product):

Cobalt(II)sulphate 7H <sub>2</sub> O	60 mg
Potassium iodide	59.000 mg
Sodium molybdate 2H <sub>2</sub> O	20 mg
Ammonium Iron citrate	50.000 mg

## Contains

100 ml dietary product for racing pigeons

## DOSAGE and INSTRUCTIONS FOR USE

To improve performance during the racing period: every day 5 ml per 2-3 litres (2ml/litre) of clear drinking water.

On very hot days increase amount of water to 5 litres.

On the day of the flight only give clear water!

During breeding and moult: 5 ml per 5 litre (1ml/litre) clear drinking water 1-2 times per week.

To disinfect the trough water during the rest of the year: Once a week 5 ml per 5 litres ( 1ml/litre) drinking water.

Shake before use!

Important: Do not use galvanized or copper drinking vessels. Drinking vessels made of stainless steel may be used.
